Musharraf-mac | www.armusharraf.me | Colombo, Sri Lanka

Summary

Results-driven IT undergraduate with a strong foundation in programming, data preprocessing, and full-stack development. Skilled in Python and backend development using Spring Boot, Node.js, and Laravel, with database knowledge in MongoDB and PostgreSQL. Experienced in frontend development with Next.js and TypeScript, building REST APIs, and tackling real-world data cleaning challenges. Brings analytical thinking, attention to detail, and a practical approach to solving technical problems. Eager to contribute to reliable software solutions and data-informed decisions while further developing technical expertise within a collaborative fast-paced software development environment.

Education

- **BSc (Hons) in Information Technology** 2024 – Present
  Horizon Campus *Malabe, Sri Lanka*
  – Current GPA: 3.256 / 4.00 (5 semesters completed)
- **Diploma in Software Engineering** 2023 – 2025
  Wayamba Univercity of Sri Lanka *Kuliyapitiya, Sri Lanka*
- **GCE (A/L) - Physical Science Stream** 2018 – 2021
  BT/BC/Al-Hira Maha Vidyalaya *Kattankudy. Sri Lanka*

Projects

1. **Lankan Tourism Website** | *Website* 2026
   - Built a website for a tourism agency named as Lankan tourism
   - In here you can view their services and can see the review of the past customers and can add your review if you were one of the customers
   - And the services and whatsapp button will redirect you to their official whatsapp number
   - **Applied Technologies**: NextJS, Typescript, Tailwindcss, Firestore, GCP
   - www.lankantourism.lk
2. **Multimodal Explainable AI for Tuberculosis Diagnosis** | *AI research Tool - Pair work* 2026
   - A research in TB diagnosis using AI
   - We build this tool for research purpose using densnet CNN model and used gradcam for explanation
   - And built an NLP model for get clinical input such as cough and used SHAP to explain
   - **Applied Technologies**: Python, Pytorch, Deep learning, Densnet, Jupyter notebook, Pandas, SHAP, GradCam, NLP
   - musharraf-Mac/Detective-XAI-For-TB
   - https://detective-xai-for-tb.streamlit.app
3. **Health System** | *Microservice Web system - Group project* 2026
   - Health web system used for book doctor and treat a patient and update it to the patient profile. Also, public can calculate their BMI and if user logged in it will save it inside history also lab report will be analyzed by AI and give a brief to the user
   - **Applied Technologies**: NextJs, Tailwindcss, Typescript, Springboot, mongoDB, JWT,Redis, Docker
   - **Deployed in:**
     – **Front-end:** netlify
     – **Back-end:** GCP - Cloud run
     – **DataBase:** MongoDB Atlas
   - My role: Leader & Full Stack developer
   - musharraf-Mac/SOC-AI-Health-Web-System
   - https://health-web-system.netlify.app/

Projects - Continued

4. **Pulse Health Tracker** | *Android application - Group project* 2026
   - User can track their health conditions and daily reminder for if any daily medication needs for his health
   - **Applied Technologies**: Android Studio, Kotlin, XML, Figma for design
   - My role: Lead, Design & develop
   - MyHorizonTeam/Pulse-HealthTracker
5. **Movie ticket booking application** | *Desktop App* 2024
   - You can use it for book movie ticket
   - Especially we build this Application using OOP principles
   - **Applied Technologies**: C#, .Net, Visual studio
   - musharraf-Mac/Cinema_booking_System_OOP
6. **Personal portfolio** | *Website* 2026
   - My personal portfolio website for show my self, my skills, education and projects.
   - **Applied Technologies**: ReactJS, Javascript, AI Chatbot, ThreeJS, Tailwindcss
   - armusharraf.me

- **Check my website & Github for more projects**

Experience

Free lancer 2022 - present
My Self *City, Sri Lanka*

- Web Development project : Developed a Tourism website for a client : www.lankantourism.lk
- Other projects - Prepares documents such as books & exam papers using microsoft applications

Technical Skills

Front-End: ReactJS, Typescript, JavaScript, CSS, TailwindCSS, HTML, NextJS
Back-End: Spring-boot, Laravel, ExpressJS, PHP,
Databases: MongoDB, MySQL, PostgreSQL
DeVop tools: Git, GitHub, Docker, Kubernetes, CI/CD
Deployment: GCP, Azure, Vercel, Render, Infinitefree, Supabase, Cloudinary, Netlify
Mobile app Development: Kotlin, Java, XML, Android Studio
Machine Learning / AI: Pytorch, Python, Langchain, Agentic AI, Scikit-learn
Design: Photoshop, Figma, Canva
Programming Languages: c#(.net), Java, C, Python

Achievements & Activities

- Member of the Leo Club, Chess Club, E-sports Club, and Cyber Security Community at Horizon Campus.
- Executive board member of Student council & Sports council
- Participated chess tournaments in Campus
- Participated in marathon organized by Management faculty in horizon campus

Languages

Tamil (Native) | English (Intermidiate) | Sinhala (Very basic)

Certifications

- Python for Beginners by University of Moratuwa
- AI/ML Engineer By SLIIT
- Intro to programming – Kaggle
